PROFESSIONAL SUMMARY

Computer Science graduate (4.0 GPA) with production experience building AI agents, agentic LLM pipelines, and cloud-native architectures at Amazon Web Services, Bank of America, and Ernst & Young. Proven ability to translate ambiguous business requirements into deployed, scalable solutions - from serverless AWS infrastructure to full-stack AI-powered applications. Skilled across the full software development lifecycle with a strong foundation in machine learning, prompt engineering, and consultative stakeholder engagement.

EDUCATION

B.S. Computer Science | Livingstone College (HBCU) *Salisbury, NC* | *Expected May 2026*

GPA: 4.00 | President's List | HBCU Battle of the Brains Finalist | HBCU Living Legends Scholar

Certifications: AWS Cloud Practitioner | AWS Solutions Architect | Duke Software Engineering | Meta Frontend & Backend Developer

TECHNICAL SKILLS

AI & Agentic Systems: AWS Bedrock, Agentforce, LLM Prompt Engineering, Tool Calling, Chain-of-Thought Reasoning, Agentic Pipelines, TensorFlow, scikit-learn, Google Imagen 3 API, Claude Code, Cursor, GitHub Copilot

Languages: Python, JavaScript, TypeScript, Java, SQL, C++, Apex (familiar)

Web & Frameworks: React, Next.js, Node.js, Spring Boot, GraphQL, REST APIs, Tailwind CSS

Cloud & Backend: AWS (Lambda, S3, Bedrock, DynamoDB), Firebase, Docker, Kubernetes, CI/CD Pipelines, Serverless Architecture

Testing & Engineering: JUnit, Mockito, TDD, Integration Testing, OOP, Data Structures & Algorithms, Microservices

Tools: Git, GitHub, Figma, Tableau, Android Studio, Slack API, Wireshark, Jira

WORK EXPERIENCE

Solutions Architect Intern | Amazon Web Services (AWS) | New York, NY | *May – Aug 2025*

- Designed and deployed a **production Slack-integrated AI agent** using AWS Bedrock and Lambda, automating enterprise knowledge retrieval with agentic LLM pipelines for internal stakeholders.
- Engineered **prompt architectures and LLM tool-call flows** with chain-of-thought reasoning, ensuring reliable, production-grade agentic outputs -directly mirroring Agentforce-style solution development.
- Built scalable **serverless architectures** (Lambda, S3, DynamoDB) to automate business workflows, reducing administrative overhead by **20%**; leveraged Cursor and Claude Code throughout development.
- Translated ambiguous business requirements into deployed technical solutions through direct stakeholder collaboration, exercising consultative, customer-facing skills across cross-functional teams.
- Implemented **CI/CD pipelines** supporting zero-downtime deployments across production environments.

Software Engineering Intern | Bank of America | Charlotte, NC | *Jun – Aug 2023*

- Built **Java/Spring Boot backend microservices** supporting real-time banking workflows, applying OOP design, RESTful APIs, and modular architecture for production scalability.
- Wrote comprehensive **unit and integration tests** (JUnit, Mockito) under TDD practices; supported root cause analysis across distributed microservices.
- Automated Jira data extraction and reporting with **Python scripting**, improving team efficiency by **30%**; built Tableau dashboards driving data-informed decisions for 120+ stakeholders.

FSO Technology Consultant Intern | Ernst & Young LLP (EY) | Charlotte, NC | *Jun – Aug 2022*

- Engaged financial sector clients to resolve billing workflows using AWS, combining technical implementation with customer-facing consultative communication.
- Built a **machine learning model** to analyze real estate market data and optimize ROI; conducted AI-driven qualitative analysis on Microsoft Azure for energy-sector clients.

PROJECTS

WealthBridge — AI Financial Education Platform | *Next.js, TypeScript, React, Firebase, AI Agents2026*

- Architected and shipped a full-stack platform with an **AI-powered 'Wealth Navigator' agent** — designed prompt flows, tool calls, and reasoning chains for personalized financial guidance; projected **~40% user engagement lift**.
- Built React/Next.js frontend with real-time Firebase sync; developed Credit Repair, Smart Investing, and Mentorship modules capable of supporting **\$50K+ annual program value**.

HBCU Battle of the Brains — Recruitment Platform | *Figma, Android Studio, Java* | *Mar 2022*

- Built an interactive HBCU student recruitment platform with an 8-person team, **increasing access to career opportunities by 35%**; presented to national stakeholders at a competitive event.
